

# SOLO C3 CO test spray

SOLO C3 test spray is meant for testing JABLOTRON CO detectors, for instance the EI208W and EI208DW.

It is supplied with an attachable sleeve which prevents the unwanted dispersal of test spray from this sleeve. The spray contents are adequate for approximately 50 test doses and one sleeve is for 10 tests.

## Safety information

Don't smoke when using the test spray. Don't spray the test spray onto an open fire. The place used for testing has to be very well ventilated. Avoid any skin or eye contact during the test. Don't ever spray anyone's head during the spray application. Get medical help immediately on breathing the contents in or when any part of the human body is irritated.

## Storage

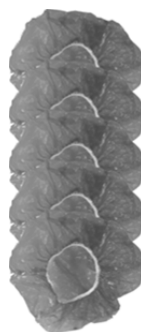

Store the product in cool well-ventilated places with a good airflow. Keep it away from children. Avoid exposing to very high temperatures (> 50 °C). Don't punch a hole in the spray container and don't throw it into a fire even if the contents have been spent.

## Application:

1. Read all Safety information before you start with testing.
2. Attach the sleeve onto the CO detector to be tested.
3. Remove sticker #2 from the sleeve to access the hole through it.
4. Put the nozzle into the prepared hole and apply the test spray for 1 s.
5. Put back protective sticker #2 to avoid any spray leakage.
6. When an alarm is triggered, press the TEST button to turn off the detector's siren.
7. In the next minute the detector should be triggered, and if it isn't repeat the test.
8. After a successful test, remove the sleeve and make a note on the sticker placed on the side of the detector. The sticker has 10 fields for tests every year until the end of the detector's lifetime.
9. If after multiple tests the detector is not triggered, it could well be faulty – so contact your service technician or the detector producer.

## The kit contains:

CO test spray 1x  
Testing sleeve 5x

*Note: Although this product does not contain any harmful materials we suggest you return the product to the dealer or directly to the producer after use.*
